### KEY SKILLS AND

#### CHARACTERISTICS

- Ability to work collaboratively as part of a team
- Problem Solving
- Possess good debugging skills

## EXPERIENCE

### PROGRAMMER, SAB SYSTEM

JULY 2024-PRESENT

- Develop and deliver customized system solutions for clients using Laravel and Vue.js, focusing on building scalable, maintainable, and user-friendly applications.
- Design and implement complex role-based access control and permission logic to accommodate hierarchical review processes and ensure proper segregation of duties.

### PHP PROGRAMMER, MTECH MANUFACTURING

JANUARY 2024-JUNE 2024

- Supported and maintained ERP systems developed with Laravel, ensuring stable performance and smooth day-to-day business operations.
- Refactored and restructured poorly organized legacy code into clean, modular, and maintainable components, improving overall code quality.
- Enhanced existing system functionalities to improve usability, workflow efficiency, and user experience.

### JUNIOR PROGRAMMER, TSK SYNERGY

MARCH 2022-DECEMBER 2023

- Maintained and supported the company's in-house ERP systems developed with Laravel, ensuring reliable system performance for the steel manufacturing business.
- Optimized Laravel Eloquent queries and model relationships to improve backend efficiency, data handling accuracy, and application responsiveness.
- Assisted in troubleshooting, debugging, and resolving system issues to minimize operational disruptions.

### SOFTWARE PROGRAMMER, PASTI NYALA

MARCH 2021-FEBRUARY 2022

- Provided system support and maintenance for internal business applications, including an attendance system developed in C# and a store management system built with PHP.
- Diagnosed, investigated, and resolved software issues, with a primary focus on correcting data inconsistencies such as missing or duplicate records.
